

# [A-3] COURSE SYLLABUS

## 1. COURSE DESCRIPTION (Approximately 100 words)

The course is designed to study, research, assemble and publish a range of statistical data on the labor market, prices, and productivity. The statistics produced by the agencies are some of the most influential economic indicators for the economy: they are frequently cited by the media and used by businesses, academics and policymakers to inform their decisionmaking. In this course we will go deep to the subject of Statistics in Labor industry.

## 2. COURSE GOALS AND OBJECTIVES (Approximately 100 words)

After completing the course, students will be able to analyse and study consumer price index, unemployment statistics, compensation rates and their impact to productivity and economy.
