Presentation Exam/evaluations checklist

The student copy from the practical exam is submitted back to the student for the last presentation with panelists assessors in the examination room. This checklist is filled up by the panelists and the last score is added to the previous result from practical exam. Take students one by one and make sure the presentation takes just 10minute for each student. Use the answer sheet for 15th lecture (previous exam) to evaluate the correctness of answers and use this checklist to mark the presentation. Note that each subpart is evaluated over 2 points as shown in the table below.

Question to be assessed	The understanding of the question	Clearness of the answers	Originality of the answer provided	How confident the student is	The overall understanding of the course	The critical thinking of the student	Overall student status
